

→ Max-width

Eg:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
<style>
```

```
div.ex1 {
```

```
width: 500px;
```

```
margin: auto;
```

```
border: 3px solid #green;
```

```
}
```

```
div.ex2 {
```

```
max-width: 500px; ✓
```

```
margin: auto;
```

```
border: 3px solid #green;
```

```
}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<div class="ex1">Width 500px </div>
```

```
<br>
```

```
<div class="ex2">Max width 500px </div>
```

```
<p>
```

```
<strong>Tip: </strong>
```

Drag the browser window to smaller than 500px wide, to see the difference
b/w the two divs. </p>

```
</body>
```

```
</html>
```
