

7) Outline

is a line drawn outside element's border.

→ Properties:
 ✓ Outline-style
 ✓ Outline-width
 ✓ Outline-color
 ✓ Outline-offset

Note - They differ from border. → Outline drawn outside element's border & may overlap other content.

→ Not part of element's dimensions; the element's total width & height not affected by width of outline.

Eg.:

```

<!DOCTYPE html>
<html>
  <head>
    <style>
      p {
        border-style: solid;
        margin: 40px;
        padding: 20px;
        outline-style: dotted;
      }
    </style>
  </head>
  <body>
    <p>Shanay/p</p>
  </body>
</html>
  
```

105

→ Outline - width →

Values
├ Thin
├ Medium
├ Thick
└ Specific size

```
eg' <!DOCTYPE html>
<html>
<head>
<style>
PS
border-style: solid;
margin: 70px;
padding: 20px;
outline-style: dotted;
outline-width: thick;
}
</style>
</head>
<body>
<p>Shanay</p>
</body>
</html>
```

← Outline - width

→ Outline - color → It is used to set color of outline.

```
eg' <!DOCTYPE html>
<html>
<head>
<style>
PS
border-style: solid;
margin: 20px;
padding: 20px;
outline-style: dotted;
outline-color: royalblue;
}
</style>
</head>
<body>
<p>Shanay</p>
</body>
</html>
```

→ Outline - shorthand →

Outline :	Outline Width	Outline style	Outline color
		(required)	

*Outline - offset

This property adds space b/w an outline and the edge/border of an element.

The space b/w $\left\{ \begin{array}{l} \text{element} \\ \text{its outline} \end{array} \right\}$ is transparent.

Eg: `<!DOCTYPE html>`

`<html>`

`<head>`

`<style>`

`{`

`border-style: solid;`

`margin: 70px;`

`padding: 20px;`

`outline-style: dotted;`

`outline-color: #royalblue;`

`outline-offset: 15px;`

`}`

`</style>`

`</head>`

`<body>`

`<p>Shanay </p>`

`</body>`

`</html>`
