

2) Gradient :- display smooth transition b/w two or more specified colour.

3 types

- Linear Gradient
- Radial Gradient
- Conic Gradient

Define by	Name	Syntax
goes down/up/right/diagonally	Linear gradient	background-image: linear-gradient (direction, color-stop1, color-stop2, ...);
by their center	Radial gradient	background-image: radial-gradient (shape size at position, start-color, ..., last-color);
rotated around a center point	Conic gradient	background-image: conic-gradient (from angle [at position], color [degree], color [degree], ...);

eg:-

```

<!DOCTYPE html>
<html>
<head>
<style>
#grad1 {
height: 200px;
background-color: #red;
background-image: linear-gradient (red, yellow);
}
#grad2 {
height: 200px;
background-color: #red;
background-image: radial-gradient (#red, #yellow, #green);
}
#grad3 {
height: 200px;
background-color: #red;

```

13 background-image: conic-gradient (0deg, 0yellow, 0green 0blue,
0black);

}

</style>

</head>

<body>

<div id="grad1"></div>

<div id="grad2"></div>

<div id="grad3"></div>

</body>

</html>
