

jQuery hasClass()

The jQuery hasClass() method is used to check whether selected elements have specified class name or not.

It returns TRUE if the specified class is present in any of the selected elements otherwise it returns FALSE.

Syntax:

\$(selector).hasClass(classname)

Parameters of jQuery hasClass() method

Parameter	Description
className	It is a mandatory parameter. It specifies the name of the CSS class to search for in the selected elements.

Code - 1 - check Class

```
<body>
  <!-- Placing HTML Code for jQuery Code demonstration-->
  <button class="b1">Check Class</button>
  <p class="classForBtn"></p>
  <!--
    This is the script link you have to put so jquery gets loaded first
    else you get error , : $ is not defined
  -->
  <script src="/jQuery/node_modules/jquery/dist/jquery.min.js"></script>
  <script>
    $(document).ready(function(){
      $(".b1").click(function(){
        var doesItHasClass =
$(".classForBtn").hasClass("classForBtn");
        $(".classForBtn").text("Has Class ?" + doesItHasClass);//true
        if(doesItHasClass){
          alert("Selected!...")
        }else{
          alert("No Join!..")
        }
      })
    });
  </script>
</body>
```
