

HORIZONTAL RULE

The `<hr>` tag defines a thematic break in an HTML page and is most often displayed as a horizontal rule.

The `<hr>` element is used to separate content (or define a change) in an HTML page.

EXAMPLE:

```
<!DOCTYPE html>

<html>

<body>

<h1>This is heading 1</h1>

<p>This is some text. </p>

<hr>

<h2>This is heading 2</h2>

<p>This is some other text. </p>

<hr>

<h2>This is heading 2</h2>

<p>This is some other text. </p>

</body>

</html>
```

LINE BREAKS

The HTML `
` element defines a line break.

Use `
` if you want a line break (a new line) without starting a new paragraph. The `
` tag is an empty tag, which means that it has no end tag.

```
<!DOCTYPE html>

<html>

<body>

<p>This is<br>a paragraph<br>with line breaks</p>

</body>

</html>
```
