

CREATE TABLE

The **CREATE TABLE** statement is used to create a new table in a database.

The column parameters specify the names of the columns of the table.

The datatype parameter specifies the type of data the column can hold (e.g. varchar, integer, date, etc.).

Syntax:

```
CREATE TABLE table_name (  
    column1 datatype,  
    column2 datatype,  
    column3 datatype,  
    ....  
);
```

Eg :

```
CREATE TABLE datasetForTechnicalPurpose (  
    SerialID int,  
    DeviceName varchar(255),  
    DeviceNumber varchar(250),  
    DeviceType varchar(255),  
    DeviceCompany varchar(255),  
    DateBrought datetime,  
    OwnerName varchar(50),  
    Feedback char(2)  
);
```
