(15) x <u>Links</u>

→ a - link ← normal unvisited link

- Visited - user has visited
- hover - when user mouses over it.
- active - the moment it is clicked

→ Text decoration

→ Background color

→ Link Buttons

a: link
a: visited → a: hover → a: active

w) PHP Sessions

→ **Links**

Eg :- `<!DOCTYPE html>`

1) `<html>`
   `<head>`
      `<style>`
         a. one (link)
         {
            color: red; ✓
         }

         a. one! (visited)
         {
            color: blue
         }

         a. one (hover)
         {
            color: #ffcc00;
         }
         /*—————————————*/
         a. two (link)
         {
            color: □ red;
         }
         a. two! visited
         {
            color: □ blue;
         }

         a. two. hover
         {
            font-size: 150px; ✓
         }
         /*——————————————*/
         a. three: visited
         {
            color: □ blue;
         }
         a. three: hover
         {
            background: □ lawn green;
         }
         /*—————————————*/
         a. four: visited
         {
            color: □ blue;
         }
         a. four: hover
         {
            font-family: monospace; ✓
         }
      `</style>`
   `</head>`

`<body>`
`<p><a>`
`<a class="one" href="../PADDING/`
  `padding.html">`
  Color change `</a></b></p>`

`<p><b><a class="two" href="../IMAGES_FOR_CSS/`
  `image001.png">`
  Font size `</a></b></p>`

`<p><b><a class="three" href="../TEXT/`
  `text-spacing.html">`
  Background
  color change `</a></b></p>`

`<p><b><a class=`
  `"four" href="../LINKS/`
  `link.html">`
  Font Family change `</a></b></p>`
`</body>`
`</html>`

) This
is
compulsory

a (: ?)

Eg 27

```html
<!DOCTYPE html>
<html>
  <head>
    <style>
      a: link, a: visited{
          margin-top : 30px;
          padding -top : 20px;
          border : 2px solid □green;
          text-align: center;
          color: □aquamarine;
          background-color: □black;
      }
      a: hover, a: active{
          background-color : □red;
          color : □pink;
      }
    </style>
  </head>
  <body>
      <a href= "../IMAGES-FOR-css/Image003.webp"> This is a link</a>
  </body>
</html>
```
