Additional shortcuts:
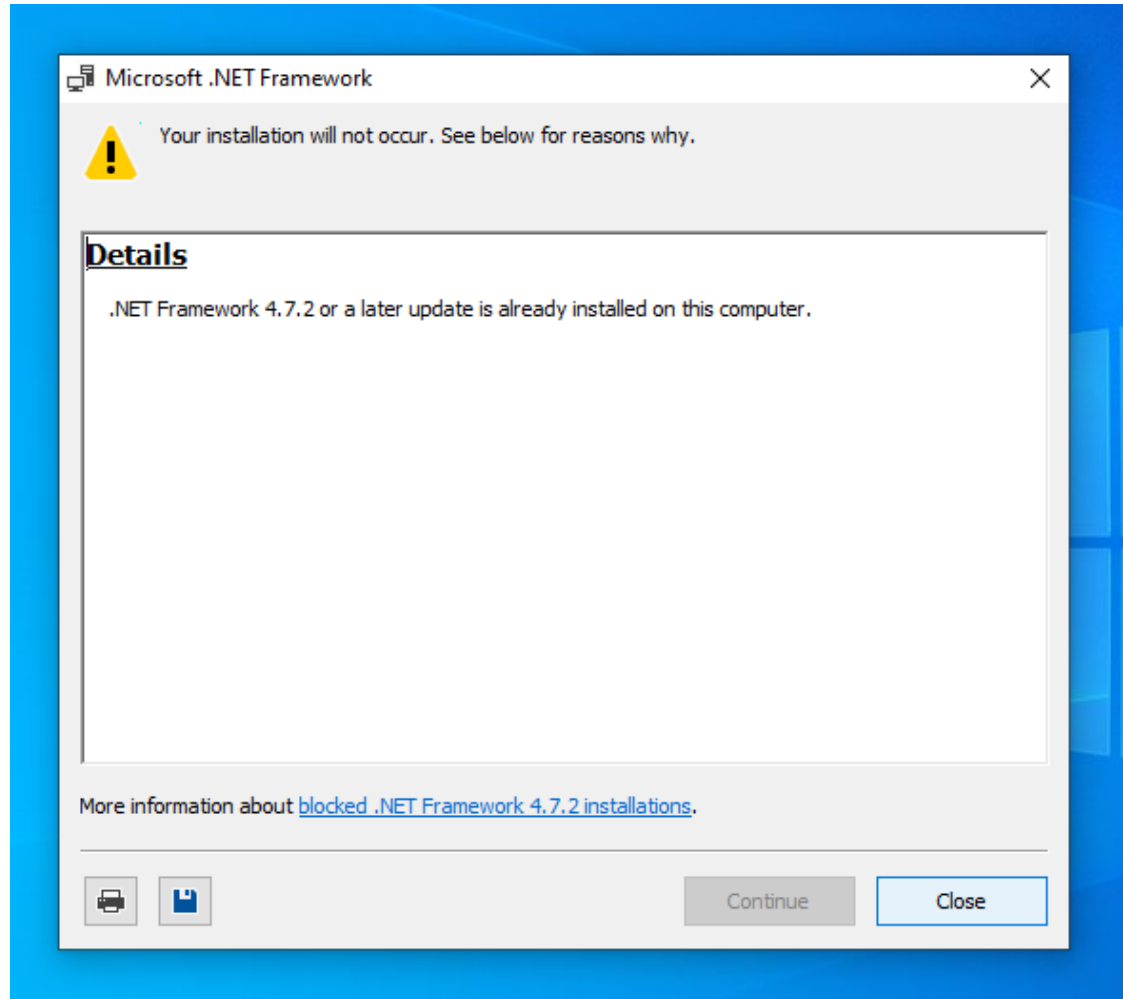

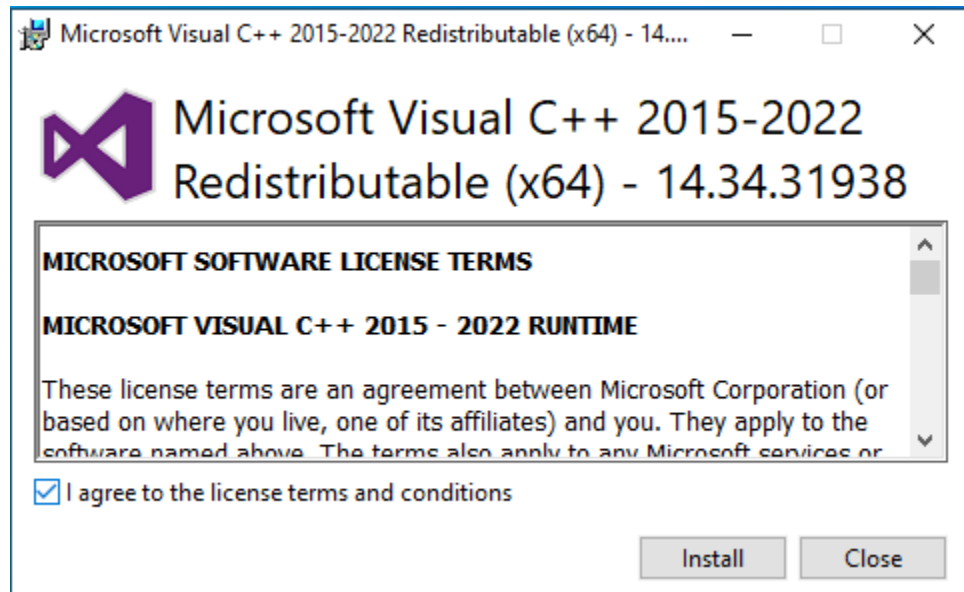

☑ Create a desktop shortcut

Next   Cancel

5. Click on Install and let the installer finish installing your application.

Setup - PACExamBrowser version 2.0   — □ ✕

Completing the PACExamBrowser Setup Wizard

Setup has finished installing PACExamBrowser on your computer. The application may be launched by selecting the installed shortcuts.

Click Finish to exit Setup.

☑ Install .NET Framework 4.7
☑ Install Visual C++ Redistributable
☑ Install Microsoft Edge WebView2 Runtime

Finish

6. Click Finish and wait for additional dependencies to be installed.

7. On this screen shown, the .NET Framework, Visual C++ and Edge webview2 runtime are dependencies for the application. We strongly recommend that you keep this checked as they will install the dependencies if your computer does not have them or else they will quietly fail if they detect an equivalent or higher version on your computer.

   a. If during dot net installation this message shown just click on "Close"
b. Next install visual c++
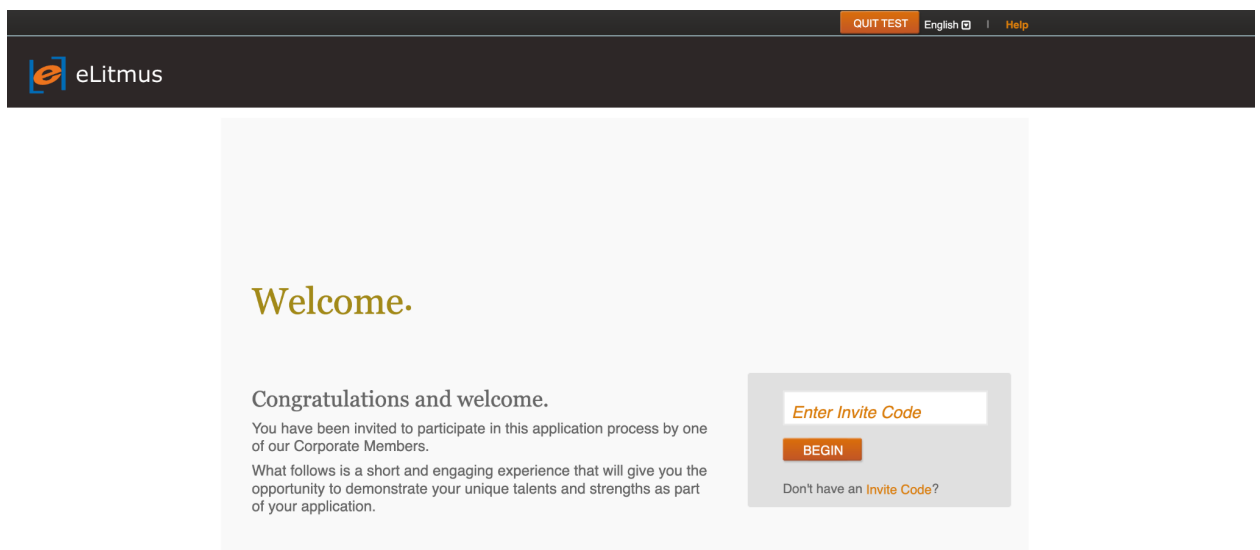

8. Next install webview2

a.

9. Now start the application named "PAC Exam Browser" from your desktop shortcut or the

Start Menu.

10. Once the application starts, you will not be able to come out of that environment or use any windows shortcuts until you quit the test

11. You should see this screen after the application starts.

Enter the invite code given to you here and follow the on screen instructions to take the test.

12. You can click on the "Quit Test" button to exit the Test.

Instructions to Take a test on PACExamBrowser

To make sure that PACExamBrowser functions properly and you can take your test securely , you have to ensure the below pointers.

- No restrictions should be implied on Network and the Application.
- Disable the Anti-Virus.
- Windows needs to be up to date.
- Should have Administrative rights on the system.
- Should not be logged in as a Guest User or as a Local User with no Administrative Rights.
- Any other program should not be running while you start the PACExamBrowser.
- Make sure there is no additional camera device either virtual(application) and external attached to the system.
    - Example -> **snap camera, external hardware camera**
    - Only primary camera attached with system should present when test is started.
- You will not be allowed to take the test if multiple camera devices are attached to the system.

Operating System:

- PACExamBrowser will run on only windows (10 and above)
- Should support minimum 4.7 **.Net framework**. (Available in the installer also)

Memory:

- 115 MB permanent free space on the default hard drive

File Size: Medium (~115 MB)

Lock down mode:

1. Once the test starts PACExamBrowser will not allow you to move out of the application before the test is finished.

2. The application will close all currently running applications
   a. Browsers i.e. Mozilla Firefox, Google chrome etc
   b. Others (like Skype etc.)
3. The PACExamBrowser doesn't have any navigation buttons, but the optional reload button.
4. Wireless or Wired Screen Sharing:
   a. You can only give the test on your primary monitor.
   b. If PACExamBrowser detects that you are using a wired or wireless second screen, it shows you a warning and doesn't let you continue the test until you remove all additional screens.
   c. The test will terminate if you click on "Ok" and we detect additional monitors still connected to the system.
